

FAQ for RFP

The following questions and concerns were raised on the Pre-bid meeting held on 22 March 2018. Please see the clarifications to the questions below:

Sr. No.	Bidder's Question/Concern	Clarification from NITB
1	It is mentioned in the point 4 of solution specs, for this specific activity there is an IBM QRadar Vulnerability Manager add on . We wanted to know if this is part of your requirement or not.	We want to identify various security risks in our network by using a vulnerability data.
2	Similarly, in the point 5 of solution specs, Incidents Forensics is mentioned, and for this function we have IBM QRadar Forensics Add on . Please let us know if this is part of your requirement or not.	Our requirement includes the investigation of incidents and compilation of comprehensive reports.
3	There's no mention of Hardware in the Solution Specs of the Security Appliance. Please clarify if hardware is also required or just the firewall.	Hardware based solution is mandatory.
4	After reading security appliance related part it seems like you are looking for a WAF or UTM solution. Can you kindly share what exactly are your requirements?	UTM solution. To secure the medium enterprise network (300 to 500 users).
5	What is the no. of devices that you want to monitor with the SIEM solution?	Currently, we are expecting to have a minimum of 300 devices for the workstation. However at the time of deployment there is a possibility that there can be an increase of 100-200 machines.
6	What are the type (cisco, juniper etc.) of devices that you want to monitor with the SIEM solution?	No information available yet.
7	What are the applications running in your network that you want to manage?	No information available yet.
8	Do you have windows based server in your infrastructure? And do you have any specific logging requirement for those servers?	Windows based server. In current scenario we don't have any specific requirement but it may change during deployment.
9	Is the software/virtual solution acceptable or hardware based solution is mandatory?	Hardware based solution is mandatory for security appliance.
10	Has the hardware been procured? If yes please share specifications.	HPE Proliant DL380 Gen9 <ul style="list-style-type: none"> Intel Xeon E5-2650v4 (2.2 Ghz/12 core/30MB/105W)

		<ul style="list-style-type: none">• HP 128 GB (bx16GB) DDR4 memory kit• HPE (4x600GB) SAS 12G Enterprise 15K SFF• Microsoft Windows Server 2016 (16 core) standard
